

Sample MTH 261 Paper

Damien Adams

Portland Community College

June 10, 2018

Abstract

This paper seeks to give an example of what a paper might look like and means to be a template for the student's paper. T_EX is not easy to learn, so this is meant to streamline the process. Any technical questions should be Google'd and/or posed to the instructor.

This is where you should type your paper. Be sure to write in complete sentences. You should use correct grammar.

When you begin a sentence, it should not begin with a numeral. When you include a figure, it should have a caption.

Begin your paper with an introduction of the problem. Afterwards, explore your topic. When you are finished with your topic, write a conclusion. The last part of your paper should be a bibliography.
